

Integrity Coax Plate

2-6001

Product Description

The new Suttle Integrity coax plate provides a different way to look at trouble free installations. The downward orientation of the Integrity Series™ delivers improved performance and value in the areas of network integrity, bend radius integrity, and most importantly customer relationship integrity. Start eliminating damaged plates today with the unique Integrity Series™ products.

Features

- Protects connectors from damage from objects forced against the plate
- Attractive low profile
- Accommodates one or two coaxial lines.
- Easy to install for new construction or replacement of existing faceplates.
- Tear out feature for cable pass through (no F-81 barrel connectors)
- Custom branding available (call for minimum order quantities)
